

MAGMA FIRESTOP

INNOVATIVE FIRE RETARDANT SOLUTIONS

FR-LATEX

Common **fibreboard** ceilings are very flammable and many found by controls of local fire departments needed to removed. **This is not necessary!**

Existing **fibreboard** ceilings will comply with the fire standards when painted with Magma Firestop FR Latex. After application with this two layer system, the ceiling will comply with class 2 according NEN 6065.

- Economic solution
- Environmentally friendly
- **Fire retardant wallpaint of great aesthetic quality**
- **Provides sense of security**

No Fear No Fire!
