

# MAGMA FIRESTOP

INNOVATIVE FIRE RETARDANT SOLUTIONS

IMK-433

Legislation obliges that decoration materials, like fabrics, are of fire retardant quality. After a professional fire retardant application, many materials comply with relevant fire standards.

Magma Firestop® IMK-433 is suitable to provide fabrics made of blends of synthetic and natural fibres like cotton, a fire retardant quality.

- Environmental friendly
- Complies with ISO 6940/41 and many other international standards
- During a Magma Firestop® application, daily work in schools, hotels, restaurants, etc. will not be interfered

*No Fear No Fire!*
